

PennFuture

GET REAL ON CLIMATE CHANGE.

It's 2017 and your environment is under attack.

What can you do?

1

Become a PennFuture Member. Donate \$5 a month or more to support our legal and legislative battles against climate change and big polluters.

2

Become a Citizen Advocate & Join the ACE Program. Our Advocates for Conservation and the Environment volunteers provide policy makers with an opportunity to learn from citizens about environmental and public health issues affecting their communities.

3

Call Your State Legislator. Join our e-mail list and stay connected on environmental votes that affect your family's air and water sources. Let's work together as we make calls, sign petitions and take action.

4

Switch to Clean Renewable Energy. It's easier than you think and often more inexpensive than dirty energy sources. Support the clean energy movement and visit papowerswitch.com to get started.

5

Report Pollution. Call 1-888-723-3721 if you see dumping, smell unusual odors, or witness a fish kill in your community.

Tell us why you **#StandWithPennFuture**
